

The Coffin Lifter Pro reduces the times you need to transfer a coffin and removes the heavy lifting. The Coffin Lifter Pro can also help away from your premises as it may be transported under the hearse deck, for use, as and when needed. The Lifter is battery powered and mains chargeable and is controlled from a mounted foot controller. The Lifter can also be fitted with a velvet cover and used in the traditional way in your Chapel of Rest.

The Coffin Lifter Pro has been made with a dual direction design that allows the rollers to be changed between side loading and end loading.

The parts also benefit from having a roller lock on each side giving the product a total of 4 roller locks.
