

The new Compact Scissor Lift has been designed for where space is limited. This new lifter can take up to 35 stone and it's compact design allows it to be used in various situations. The Compact Scissor Lift reduces the times you need to transfer a coffin and removes the heavy lifting. The Compact Scissor Lift is battery powered and mains chargeable and is controlled from a mounted foot controller. It can also be fitted with a velvet cover and used in the traditional way in your Chapel of Rest.

The Compact Scissor Lift has an option to be made with a design (dual direction) that allows the rollers to be changed between side loading and end loading. The parts also benefit from having a roller lock on each side giving the product a total of 4 roller locks.
