

Introducing the Multilevel Dual, a trolley designed with an innovative front and rear leg design that unlocks a world of possibilities. This ingenious design includes the option of an independent rear leg system, ensuring the weight is securely held until the trolley is safely inside the vehicle.

Moreover, we've enhanced its stability by extending the wheelbase and widening the rear track. Plus, you have the flexibility to choose between two fixed wheels or multidirectional wheels, making this already popular model even more versatile, adaptable to your specific needs.
